

3.1)

1. A red black tree have:

- root is always black
- other nodes are red or black.
- Path from each node root to each leaf must have same number of

black nodes.

- 2 red cannot be ~~next to each~~ connected  $\leftarrow$  cannot be parent or child of red.

Ex:

○: black

□: red

Ex:

□: red

○: black

Violate

root is black

(1)

□: red

○: black

Violate red can not be next to each other

(2)

Violates ~~path from leaves to~~  
root to leaves

have same number of black nodes.  
(3)

is not RB tree  
violate (3)

○ : black

□ : red

○: Black

□: red

: is a red black tree

: not a RB tree

violate (3)

: not a RB tree  
violate (2)

is a RB tree

4.

node 7: black height = 2

node 3: // = 1

node 10: // = 2

node 10: // = 1

node 27: // = 1

node 8: // = 1

node 11: // = 1

node 26: // = 1
